Brain-Bending Labyrinth

Solve the problems. Then, find your way through the labyrinth by following a path of increasing decimal answers. To form a path, a corner or a side must connect the diamonds. Be careful, you don't want to land on a diamond with a mummy, skeleton, or an answer with the unlucky number 13!

The labyrinth consists of 25 diamonds arranged in a grid. Each diamond contains a multiplication problem. An arrow points to the top-left diamond, and another arrow points to the bottom-right diamond. Some diamonds contain illustrations of a mummy, a skeleton, or the number 13.
